Clarendon Sixth Form College
is a 'Good' college

Psychology is the scientific study of the mind and behaviour.

The course covers a wide range of topics; running through all topics is a strong emphasis on the scientific process.

- **Have you ever wondered why some people develop mental disorders, whilst others don't?**
- **Why those convicted of crime and sent to prison return to society reformed, whilst others go on to commit further crime?**

Psychology attempts to examine questions such as this; it is a fascinating science with cutting edge research that has many real world applications.

Understanding human behaviour can help address many of the problems and issues in society today, such as crime, reliability of eye-witness testimony, treatment of psychological disorders, and brain recovery after trauma.
