Creative Digital Media and Technology

It's Official!
Clarendon Sixth Form College
is a 'Good' college

This two year course in Creative Digital Media will give you the skills and knowledge that you need to get into the media industry.

If you're set on a career as camera operator, sound recordist, vision mixer, editor, director or anything to do with television production, corporate video production, film, music video, marketing, page layout or photography then this is the perfect course for you.

The course is split into units that will teach you how the industry works and more importantly, the hands-on production skills that you will need.

Courses available:

Level 2 Creative Digital Media and Technology
Level 3 Creative Digital Media and Technology

Learning experience:

You will complete this course as a multi-disciplined, multi-skilled individual who can confidently integrate into a variety of different media industries. You will have the confidence and motivation to sell your ideas to the most influential media companies and your skills will be to a professional standard. From planning and research to bringing your ideas to life in a variety of creative work this course offers a unique experience.

Progression routes:

Some of our learners go straight from their Level 3 course to the media industry confidently and work as a runner, production assistant or social media manager.

Many of our learners go onto higher education courses such as media production, radio production, graphic design or film production.
